#### **SECTION 32 31 00**

#### ANTI-RAM FENCE

(Innovo Cable Net Fence)

#### PART 1 - GENERAL

# 1.1 SCOPE

This specification defines the requirements for the manufacture and installation of the Cable Net antiram fence system.

# 1.2 SYSTEM DESCRIPTION

Supply a total anti-ram fence system of the Innovo "Cable Net Fence" engineered design, including all required components (cables, supports, super posts, I-beams, and hardware).

#### 1.3 SUBMITTALS

A. <u>Product data</u> Provide manufacturer's descriptive literature for standard or customized products used to produce work of this section.

# B. Shop Drawings

- 1. Show locations and details of vehicle fence system including each major element, and details of operation, hardware, and accessories.
- 2. Indicate materials, dimensions, sizes, weights, and finishes of components.
- 3. Include plans, elevations, sections, foundation drawings and other required installation and operational clearances, and details of anchorage.
- 4. Installation procedures and instructions.
- C. <u>Fence Certification</u> Provide documentation that anti-ram fence system is confirmed by engineering analysis and certified.
- D. <u>Operation and Maintenance Manuals</u> Submit Operation and Maintenance data in accordance with the following:
  - 1. Operation instructions are to provide the step-by-step procedures required for system startup, operation, and shutdown.
  - 2. Maintenance instructions are to include routine maintenance procedures, possible breakdowns and repairs, and troubleshooting quide.
  - 3. Recommended Spare and Replacement Parts List. Provide part number, recommended quantity, brief description, and purchasing source.

# 1.4 QUALITY ASSURANCE

- A. <u>Verification of Compatible Site and Fence Dimensions</u> The contractor is to become familiar with all details of the work and verify dimensions in the field as required for coordination.
- B. <u>Nameplates</u> Affix the manufacturer's name, contact for service, and catalog or serial number permanently to a plate securely attached to the equipment in a suitable location.
- C. <u>Label</u> Label each operator (i.e., motor) indicating that the operator mechanism has been tested for full power of all components.

# 1.5 DELIVERY, STORAGE, AND HANDLING

- A. Elements of the fence system are to be prefabricated, prefinished, and equipped with devices and accessories to the greatest extent possible.
- B. Elements of the fence system are to be packaged, handled, protected, and delivered from the manufacturer's facility to the installation site.

#### 1.6 WARRANTY

The manufacturer is to provide its standard 1 year from date of delivery limited warranty.

# PART 2 - PRODUCT

# 2.1 BASIS OF DESIGN MANUFACTURER

A. Innovo Security Works

5410 Homberg Dr. STE 16 Knoxville, TN 37919 USA

Phone: (865) 481-2280 Fax:(865) 381-1610

Website: www.innovosecurity.com

B. All elements of the anti-ram fence system, including all associated cables, supports, super posts, I-beams and hardware are to be obtained from a single source.

# 2.2 CABLE NET FENCE

# A. Configuration

- 1. The anti-ram fence system is comprised of three strands of steel cable between anchored super posts and supported between the super posts by support posts or attached to host fence.
- 2. Perimeter layout to match terrain and other obstacles.

# B. Super Post Foundation

- 1. Anchor depth of 60 inches.
- 2. Anchor Dimensions at each super post of 48 in x 36 in (Rectangle).

# C. Crash Rating

- 1. Provide certification based on engineering analysis that the fence design meets or exceeds:
  - i. DOS SD-STD-0201. Rev. A: K4. K8. or K12
  - ii. ASTM F2656-15: M30, M40, or M50

# D. Recurring Panel Width

1. Super Post every 100 feet to 200 feet or less where penetration is restricted.

# E. Support Posts

1. Cables are held in place between super posts by break-away support posts or by attachment to host fence to add crash resistance to an otherwise non-crash rated fence.

# F. Height

1. All fence elements are to be less than 60 inches in height.

## G. Materials

- 1. Steel Shapes, Plates, and Bars ASTM A36; except where otherwise indicated.
- 2. <u>Pipe and Tubular Products</u> ASTM A53 grade B, or ASTM A500 grade B; except where otherwise indicated.
- 3. <u>Cable</u> Independent Wire Rope Core (IWRC) wire rope, 6 x 19, Galvanized Extra Improved Plowed Steel (EIPS).
- 4. Welding Rods and Bare Electrodes Welding is to be in accordance with AWS D1.1/D1.1M using welding materials recommended by AWS specifications for the metal and alloy being welded in each element of the fabrications.

#### 5. Bolts and Fasteners

- i. Commercial bolts and fasteners to be used as needed to accomplish design requirements.
- ii. Where within reach of intruders working from attack-side of facilities, including working from inside sallyports, non-removable bolt/nut units (not removable by use of commonly available hand tools) are to be used.
- 6. <u>Concrete</u> 4,000 psi (28 MPa) Portland Type 1 concrete with an industry standard cure time of 28 days. Normal maximum aggregate size shall be 1.5 inches (38 mm). Vibrate concrete to fill all voids.
- 7. <u>Concrete Inserts</u> Furnish anchorage units to be placed in concrete substrates, of hot-dip galvanized cast-iron/malleable-iron body, design/type as indicated; ASTM A153 zinc coating, ASTM A47 casting.
- 8. <u>Setting/Anchoring Cement</u> Provide non-shrinking, non-staining, expansion-type cementitious compound intended for the installed design, factory pre-packaged for mixing with water at project for a pourable and trowellable mix, recommended by manufacturer for exterior exposure (ASTM C109 or ASTM C33).

#### H. Finishes

- 1. Powder Coat
- 2. (Optional) Metallized Coating
- 3. (Optional) Galvanized Coating
- 4. (Optional) Epoxy Coating
- 5. (Optional) Rust Preventative Coating

#### PART 3 - EXECUTION

# 3.1 EXAMINATION, COORDINATION, PREPARATION

- A. Manufacturer to provide the service of a manufacturer's representative who is experienced in the installation, adjustment, and operation of the equipment supplied.
- B. Contractor and purchaser will coordinate installation of fence system with installation of related work.
- C. Contractor will delivery anchorage inserts, sleeves, and other elements to be cast in concrete work.

#### 3.2 INSTALLATION

Installers are to perform installation in accordance with manufacturer's instructions.

# 3.3 TRAINING

When requested by purchase order, the manufacturer is to provide operator training to include:

- 1. An overview of the system.
- 2. Essential controls and displays.
- 3. Safety precautions.
